Attention Homeowners!

Endorsement by the "Cajun Contractor" Michael King, HomeTalkUSA.com:

What if I tell you that there is a gutter system that you can install that can prevent leaves, trash, and falling debris from ever clogging your gutters again? That's right; it's the Freedom Filter by GutterPlus! And here's how it works. The filter installs neatly and snug inside the gutter, which completely fills and seals the top of your gutter system leaving no room for debris. It will not become dislodged like guards, screens, or helmet covers that don't work; their unique system is simple, and will not clog, guaranteed.

I have seen over the years the damage that overflowing gutters have cost plus the extensive structural damage and promotion of mold and mildew growth. Now you see why I, Michael King, want you to call my friends at GutterPlus today.

- ★ Installs neatly into gutters
